

**Level I and II review stoke holes (heat sinks) for refuses contaminated with oil products**  
**Rompetro Refinery Constanta**

# SETTLEMENT

- The location of the analysed objective is within the Petrochemical Plant, in the south-east area (annex 1). The estate and the objective belongs to S.C. ROMPETROL REFINERY S.A.
- The S.C. ROMPETROL RAFINARE S.A settlement area is located in the North of Navodari City, app. 20 km distance from Constanta. It is bordered by Navodari lake towards the West and by Corbu de Jos lake in the North. To the East is the Black Sea, in the South the Navodari children camp site.

## CONCLUSION

- A proposal should be made to the competent environmental authority to consider the possibility of mud recovery from stock-pile nr. 3. This should be achieved by setting up equipment to produce pellets which could be used for heating of houses.
